Three ways a product gets found.

SEO
AEO
GEO

SEO

Search engines read the title, the headings and the links. A vague title is a product they never list.

AEO

Answer engines lift the page that answers in plain text.
Specs trapped in a picture do not get picked.

GEO

Generative engines cite the page they can quote. Facts, written out, are what they quote.

Same four fixes. All three readers.

01 Titles that name the exact product

02 Specs as text, not a picture

03 Answers to real questions

04 One price, everywhere
