VIRTUAL FITTING ROOM

How a virtual fitting room actually works.

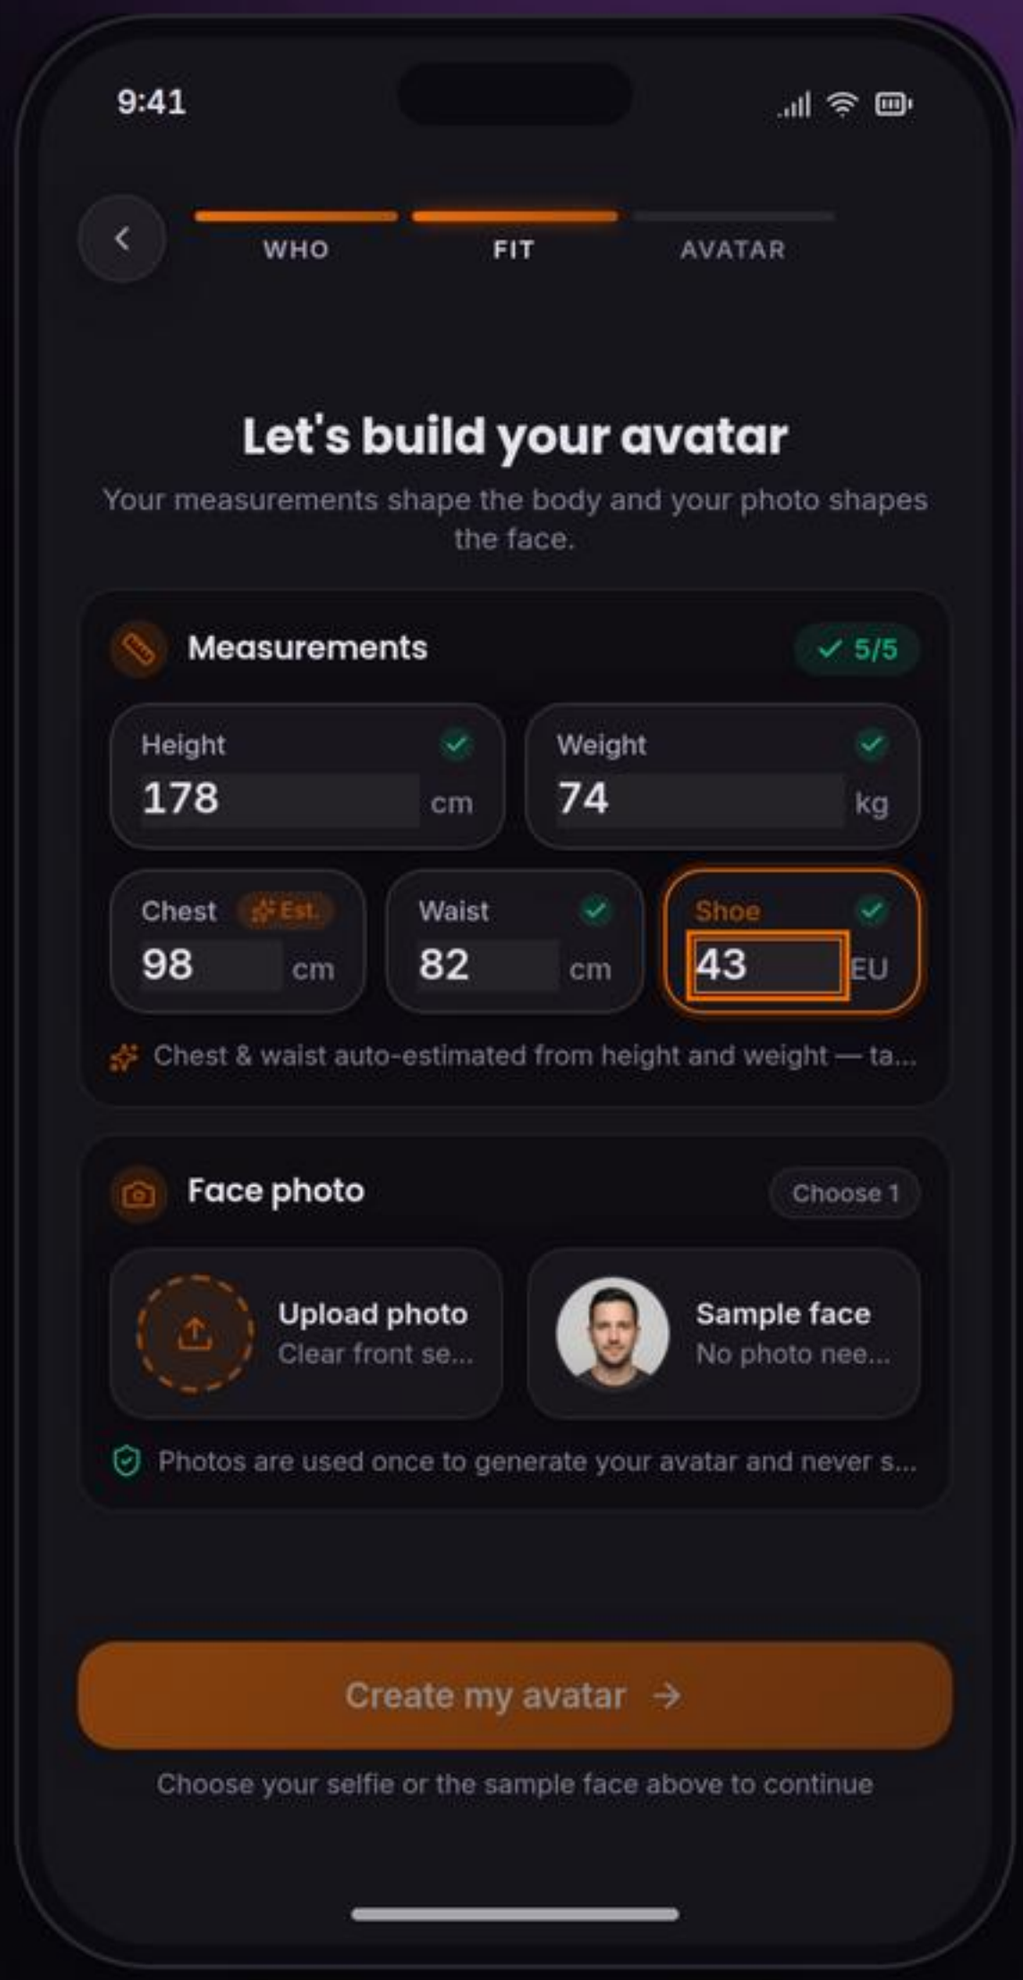

Four steps, recorded on a live demo store.

STEP 01

Build your avatar.

The shopper adds height, weight and a few measurements, plus one photo. No app to download.

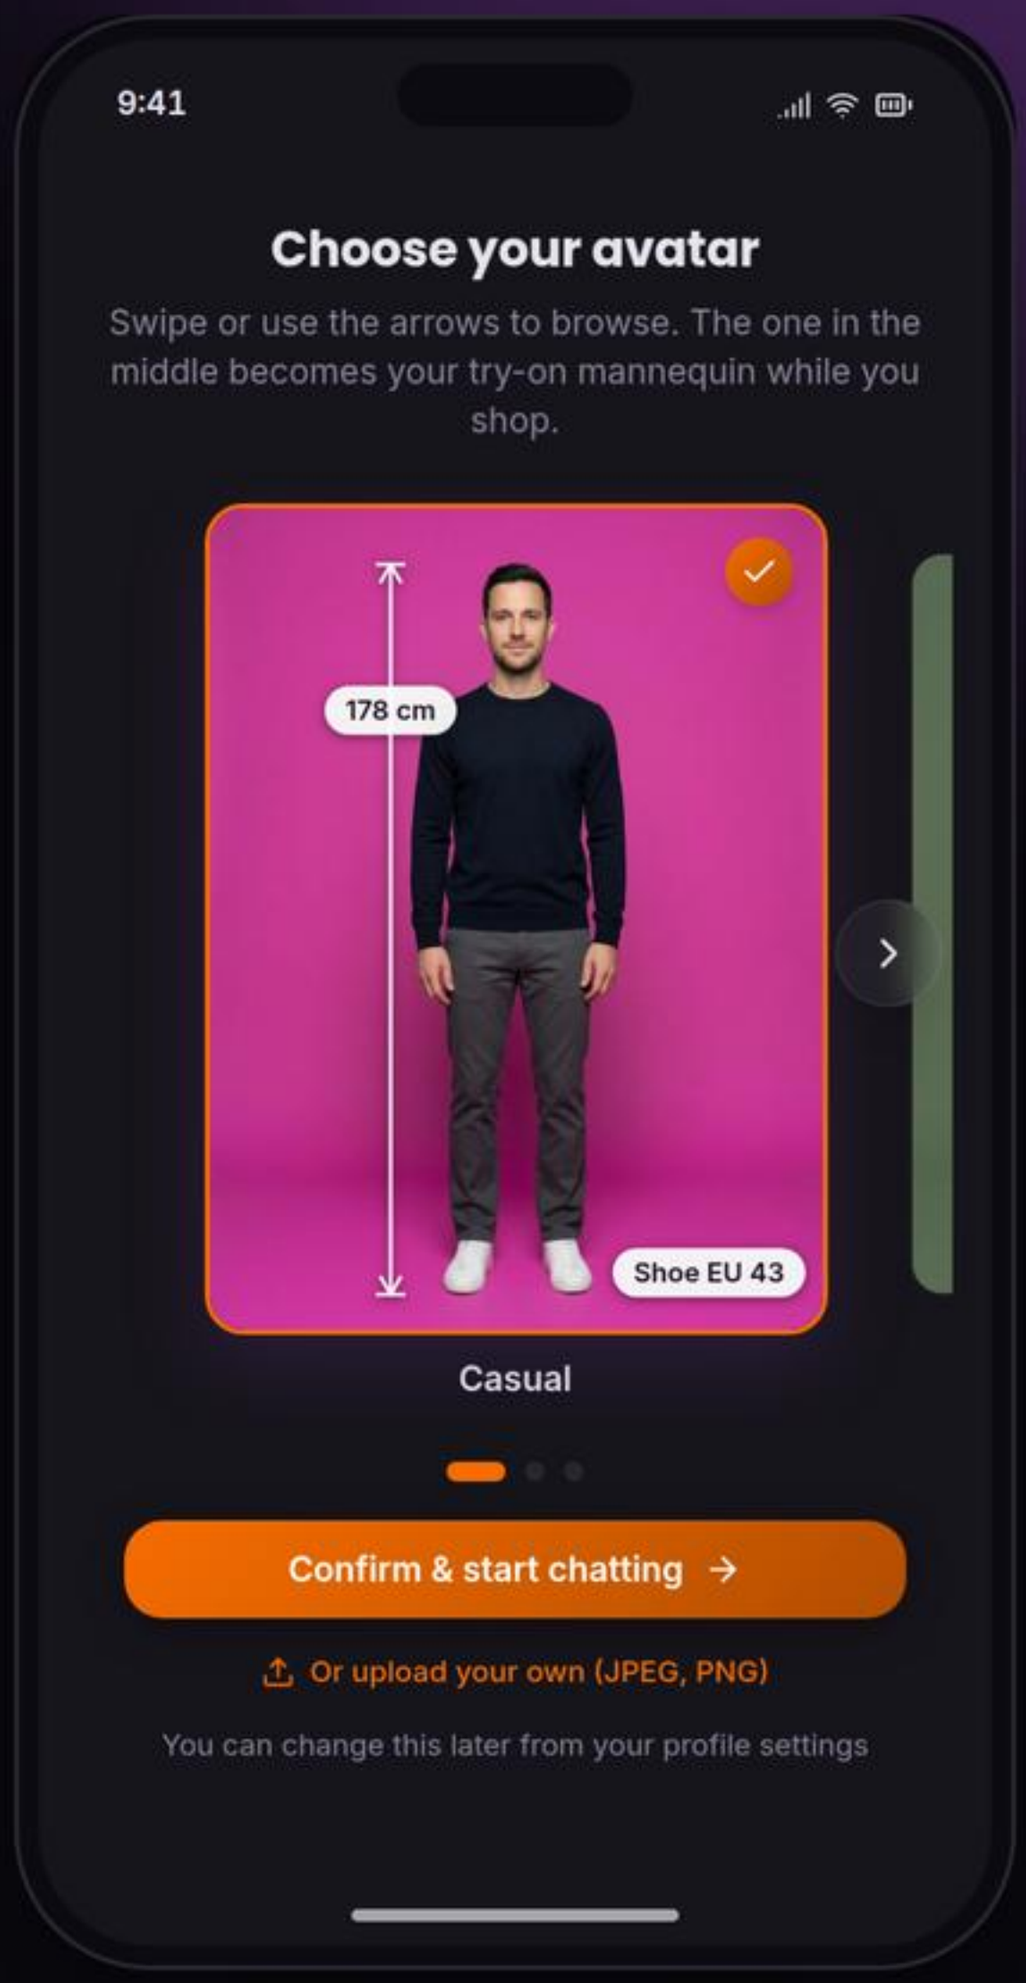

DEMO STORE · SAMPLE AVATAR

STEP 02

Pick the one that feels like you.

Persona creates avatar options that keep the shopper's face. The chosen one becomes their fitting model.

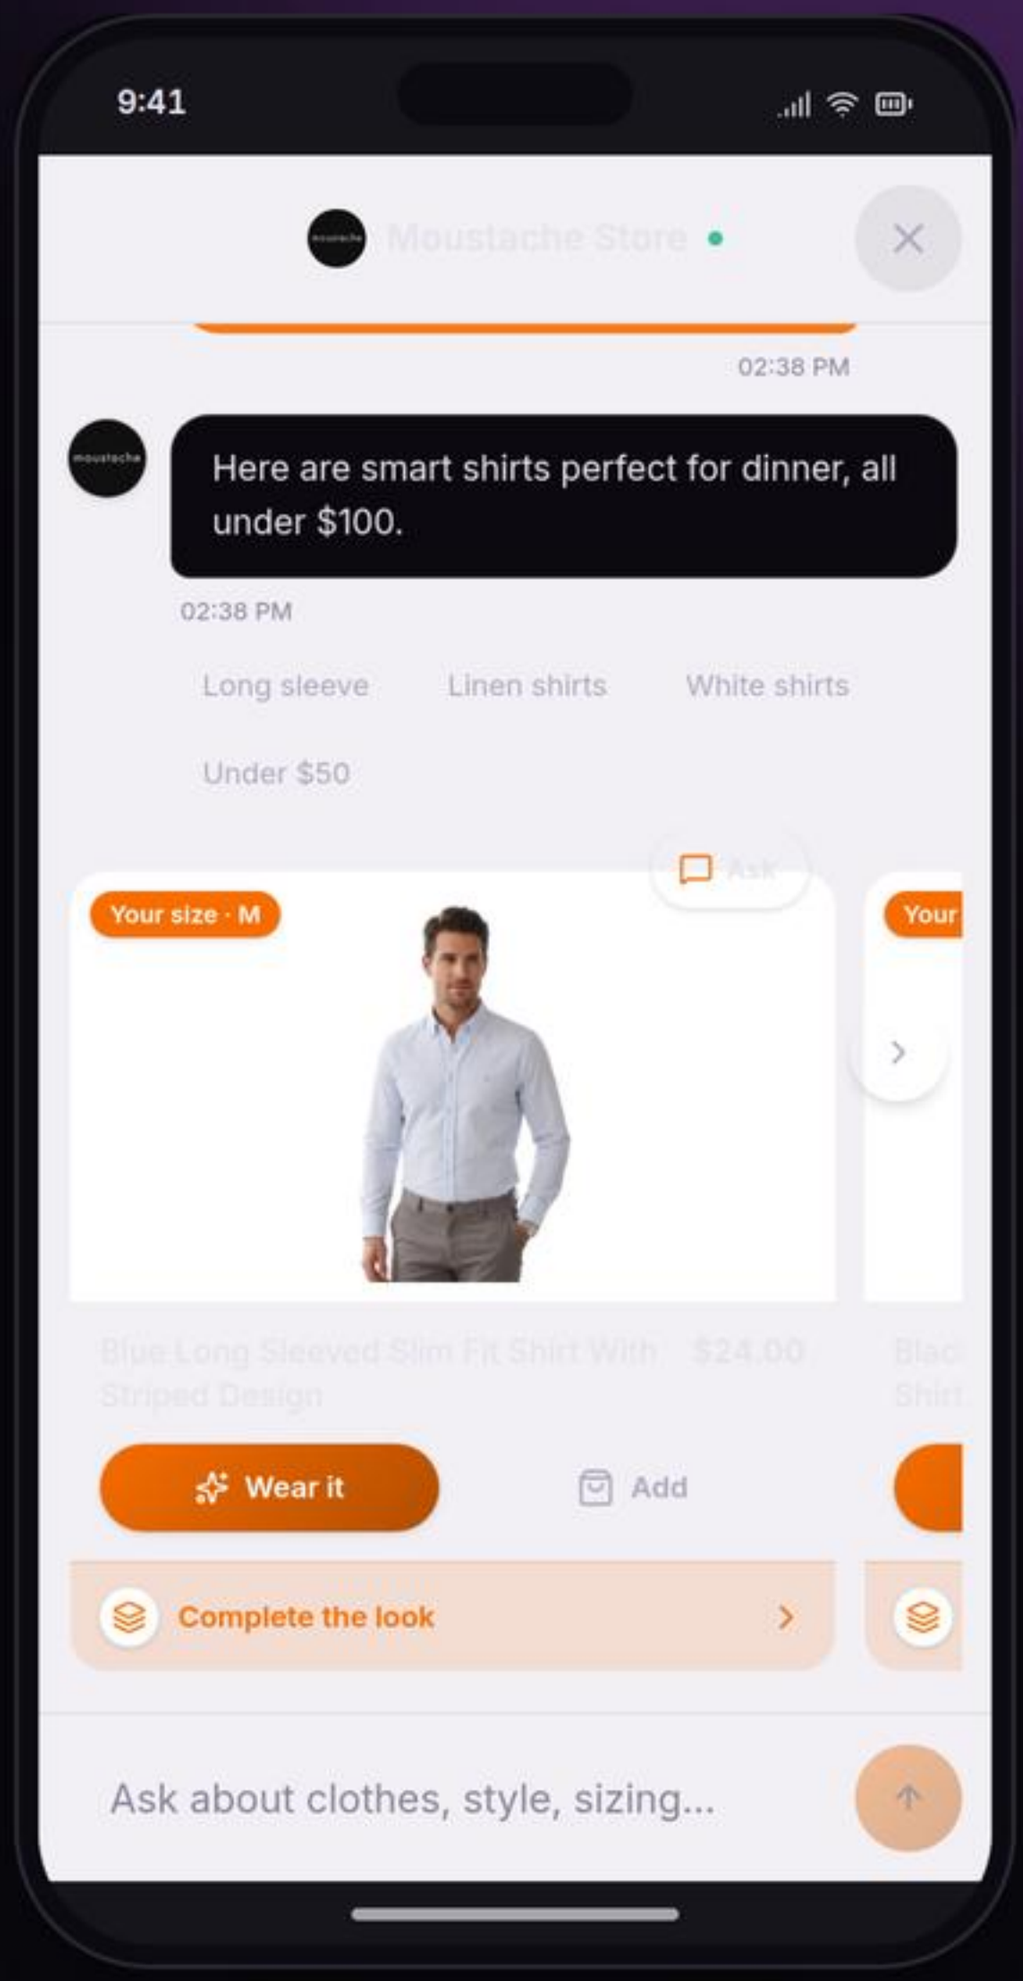

DEMO STORE · SAMPLE AVATAR

STEP 03

Ask the stylist.

In their own words, like "a smart shirt for a dinner, under $100". Answers come only from the store's real catalog.

SWIPE →

STEP 04

See it on you. Add to cart.

The outfit is rendered on the shopper's own avatar, with a size suggestion. One tap adds it to the store's cart.

FOR RETAILERS

It's one script tag on your store.

```
<script src="persona/widget.js" async></script>
```

01 Works with Shopify and WooCommerce

02 Recommends only what is in your catalog

03 Your brand, your colors, your checkout

04 Shows the sales Persona drives

NEXT STEP

Give every shopper a fitting room.

See Persona running on your own catalog.
