SHOPPER PRIVACY

What happens to the shopper's photo?

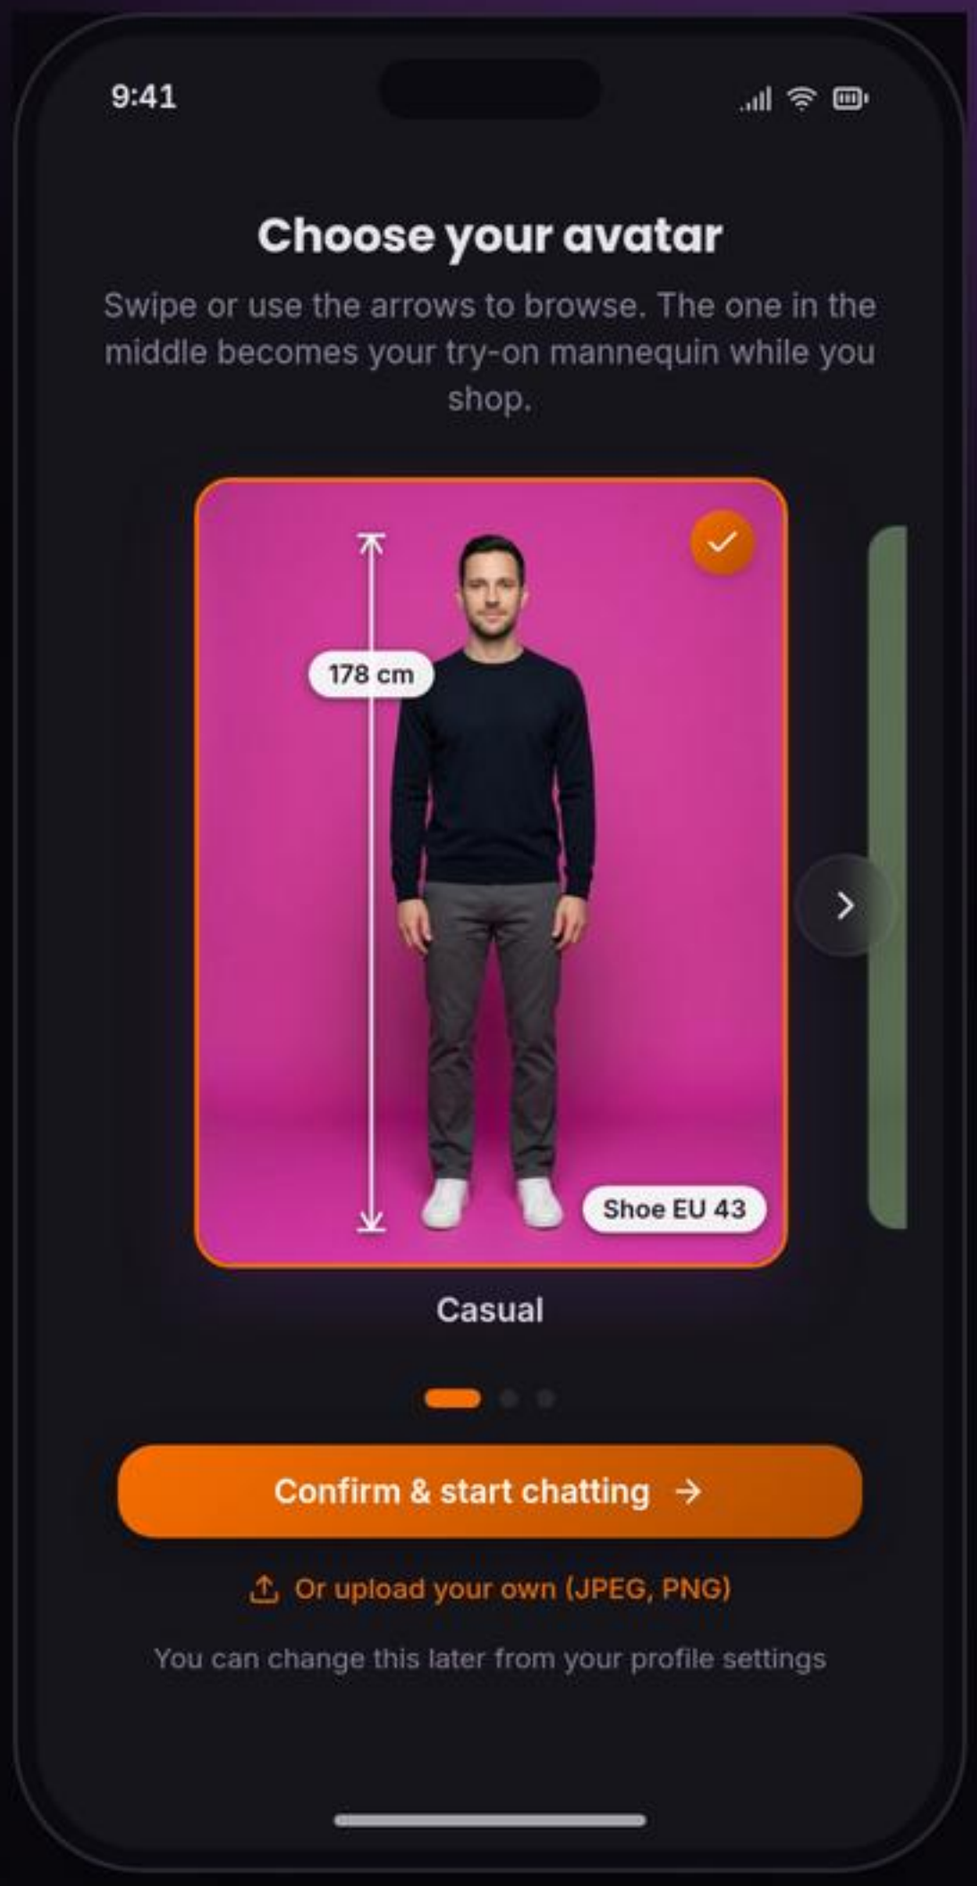

The first question retailers ask us. Here is the plain answer, step by step.

01 · ONE JOB

It builds the avatar. That's all.

The photo is used to create the shopper's avatar options. The raw photo is removed from the browser before anything is saved there.

DEMO STORE · SAMPLE AVATAR

02 · A SHORT LIFE

Held in memory. Then it's gone.

Not written to a database. The server keeps the photo in memory only, so the shopper doesn't upload it again every message.

0 min
Photo uploaded, avatar created

30 min
Image provider deletes the upload

2 hours
Server memory cleared, at the latest

03 · MEASUREMENTS

The merchant never sees the numbers.

Height, weight and measurements are used for fit and size suggestions. They are not shown in the retailer's dashboard.

USED FOR THE SHOPPER	
Height	fit
Weight	fit
Chest, waist	size
Shoe size	size

SHOWN TO THE MERCHANT	
Height	no
Weight	no
Chest, waist	no
Shoe size	no

04 · SIGN-IN

A code by email. No passwords.

Shoppers sign in with a 6-digit code and accept a privacy notice the first time. One account holds up to 3 profiles, for the shopper, a partner or a child.
